

Ricky Kamuren Koskei

Technical Support Engineer

kamurenricky254@gmail.com | +254 110392967

Nairobi, Kenya

CAREER SUMMARY

Technical Support Engineer with hands-on experience supporting web-based systems and end users across Tier 1 and Tier 2 support. Background in software engineering with practical exposure to application troubleshooting, server environments, and cloud fundamentals. Familiar with Linux/Ubuntu workflows through personal and experimental use. Known for clear communication, empathy, and a customer-first approach to resolving technical issues efficiently. Highly motivated to grow within a product-focused support role serving developer communities.

EDUCATION

BSc Software Engineering / Multimedia University of Kenya

2017 – 2025

- Relevant Coursework: Cloud Computing, Software Engineering, Systems Analysis, Database Management, Web Technologies.

Software Development Program / Power Learn Project

2025

- Front-end & Back-end development concepts
- Developer workflow exposure

PROFESSIONAL EXPERIENCE

IT Support Intern

Posta Kenya | October 2024 – January 2025

- Delivered Tier 1 and Tier 2 technical support, resolving software, system, and network-related issues while maintaining high user satisfaction.
- Troubleshoot Windows environments professionally, resolving issues related to applications, accounts, and network access.
- Gained familiarity with Linux/Ubuntu workflows through personal OS usage and experimentation, strengthening versatility across platforms.
- Managed incidents and service requests using GLPI, ensuring accurate documentation and timely resolution.
- Performed Active Directory administration tasks, including account management, access control, and credential resets.
- Provided remote technical support using TeamViewer and AnyDesk.

- Contributed to internal documentation and knowledge sharing to reduce recurring issues and improve response times.

Software Developer Intern

Macangira Africa | May 2022 – July 2022

- Assisted in developing and maintaining web-based applications across backend and frontend components.
- Troubleshoot application-level issues, strengthening skills in debugging, log analysis, and systematic problem-solving.
- Collaborated with developers to test features, review implementations, and improve system reliability.
- Gained exposure to deployment workflows and application support in production environments

Data Annotator / Contract

Clickworker - UHRS

- Annotated and validated datasets for AI and machine learning projects with high accuracy and consistency.
- Followed strict quality guidelines, strengthening attention to detail and documentation discipline.

SKILLS

Customer Support & Operations

- Managing and prioritizing support tickets
- First-contact resolution and SLA-driven support
- Communication (written and verbal)
- Knowledge base documentation and internal knowledge sharing

Web, Backend & Systems

- PHP (foundational)
- MySQL
- REST APIs
- Application debugging & log analysis

Infrastructure & DevOps Fundamentals

- Windows environment
- Linux / Ubuntu environment
- Terminal-based troubleshooting
- Nginx
- DNS and SSL fundamentals
- Cloud computing fundamentals (AWS and Azure exposure)

Laravel Ecosystem (Documentation-Based Familiarity)

- Laravel Cloud — PaaS optimized for shipping and scaling Laravel applications.
- Laravel Forge — a server management platform for easy creation and server deployment.
- Laravel Nova — a production-ready admin panel architecture and resource management.
- Laravel Nightwatch — a platform for monitoring, error tracking, and performance insights for Laravel Applications.

Tools

- GLPI (IT Service Management)
- TeamViewer, AnyDesk
- On-prem Active Directory

PROJECTS

Personal Portfolio Website

- Designed, developed, and deployed a personal portfolio website to showcase technical projects and skills.
- Live Demo: <https://portfolio-koskei-13.vercel.app/>
